- Communication Set

6 Product Features

Full-Featured USB Interface

USB 2.0 interface, support encoding output, and support UVC 1.0 protocol.

Full HD – 1080p

High-quality HD CMOS sensor with 2.07 million effective pixels for hi-def images up to 1920x1080 resolutions.

Low Light

2D and 3D noise reduction technology greatly reduces the image noise and maintains a clear image under low lighting conditions with a signal-to-noise-ratio (SNR) of 55dB (max).

H.264 Slice/SVC Encoding

Output H.264 code stream, and support Slice and SVC encoding mode, can adapt to high-end USB video conferencing applications.

Double Stream

Supports two code streams/simultaneous output (YUY2, MJPEG, H.264 any two), can reduce the host codec pressure.

Remote Control

This camera can be remotely controlled via RS232.

7 RS232 Interface

Interface diagram	No.	Function	No.	Function
	1	DTR	5	RXD
	2	DSR	6	GND
	3	TXD	7	IR OUT
	4	GND	8	NC

8 Safety Precautions

Electrical Safety

The installation and use of this product must strictly comply with local electrical safety standards.

Power Polarity

This product uses DC +12V power supply (max current 2A). Please pay attention to the polarity of power supply.

Operation

Hold camera base when moving the unit. Do not rotate camera head by hand. It may cause mechanical problems.

Disassembly

Do not disassemble the camera. Damage caused by the user's own disassembly is not covered by the warranty.

- Electromagnetic fields at specific frequencies may affect the image of the machine.
- Do not hot-plug the power supply during the use of the IP Camera.

9 Troubleshooting

Image

No image on screen

- Check that the camera power supply is connected, the voltage is normal, and the power indicator light is always on.
- Turn off the power switch to check whether the camera is self-testing.
- Check the cable of video platform and TV whether correct connection.

Image appears intermittently

Check video cables for secure connection.

Control

IR remote does not control

- Check and replace the battery for the remote.
- Check whether the camera's working mode is correct.
- Check whether the address of remote control matches the camera.

RS232 port does not control

- Check whether the camera protocol/address is the same.
- Check whether the control line is connected securely.
