iCON-10W

10 Button Programmable LAN/RS232 Controller

The iCON-10W allows control of any device that employs TCP/IP, Telnet, or RS232 control. Create macros for each button to send up to 6 commands to as many devices, or sequence commands for just one device. Simple to program and use.

PureLink offers pre-programming services when using the iCON-10W with PureLink products.

Technical Specifications
